With 106 years of heritage, we stand as a purpose-driven and diverse top team that strives to save and improve millions of lives by sustainably offering accessible, high-value medicines and healthcare solutions that address local patients' needs.

We fulfil our mission by dedicating our efforts towards three key areas of focus:

Innovative
Products

EVA Pharma
Branded Generics

Commercial
Alliances
and Services

Development Capabilities

EVA Pharma's R&D facility is a technology-driven CDMO offering a wide integrated range of services in drug product development and manufacturing.

The largest dedicated site for pharmaceutical development and services in the MENA region.

Fully compliant with GMP and GLP guidelines and fully equipped R&D laboratories and a pilot area with the highest-rated machinery.

Services:

- Contract development.
- Complete life cycle management from development, process optimization and scaling-up to commercial manufacturing.
- API synthesis.
- Drug product formulation services.
- Analytical processes development and services.

Manufacturing Capabilities

Producing 1,000,000 packs daily.

Haram

114 million medicines / year

Produces different dosage forms such as vials, ampoules, sachets, tubes, capsules, tablets, syrups, creams, inhalation, BFS, patches (hydrogel & transdermal) and ODF.

EVA Pharma 6th of October Manufacturing Complex

125,000 sqm - 206 million medicines / year

Allows upscaling of manufacturing capabilities to produce different dosage forms: tablets, capsules, sachets, soft gelatin, a dedicated area for cephalosporins, carbapenems and a dedicated sterile filling area for biologics.

The complex hosts a biologics' facility for human and animal therapeutics and vaccines. API manufacturing & animal house are under construction.

Horus (10th of Ramadan)

First dedicated immunosuppressant manufacturing facility in the MENA region.

Partnerships

Our Growth Strategy

We believe the catalytic power of collaboration creates sustainable ventures.

Our partnerships span the entire development spectrum, from API to finished product. We offer flexible business models, from pure CMO to tech-transfer, co-developments or standard licensing. We empower our partners with comprehensive regulatory assistance, door-to-door logistics management, and investment in future pipeline projects, ensuring a thriving ecosystem of innovative solutions.

Why Partner With EVA Pharma?

At EVA, we harness visionary minds and diverse solutions to create impactful collaborations.

Our cutting-edge manufacturing facilities boast accreditation from various regulatory authorities, including **European authorities, sFDA, UAE, Bahrain, and GCC**. These state-of-the-art facilities are equipped to manufacture a wide array of pharmaceutical products, ranging from solids, sterile (parenterals, sterile eye drops), DPI, patches, semisolids, Lyophilized - vaccine - insulins and cephalosporins encompassing a comprehensive portfolio of branded generics.

With over 300 products already in the market and an impressive pipeline of more than 500 products, our manufacturing infrastructure is a testament to our commitment to innovation.

This robust manufacturing backbone is complemented by an extensive marketing, promotional, and distribution network spanning the region.

EVA Pharma also has a notable collection of EU-CTD dossiers, reinforcing our position as a leading partner in the healthcare industry.

Partnerships

In-licensing:

- Biosimilars
- Vaccines
- mRNA technology
- Hormones

CDMO

- Dedicated pilot area
- Different dosage forms including
 - DPI
 - Tablet
 - Sachets
 - BFS (Unidose - Multidose eye drops- WFI)
 - Ampoule
 - Lyophilized
 - Insulins
 - Patches
 - Capsule
 - Soft gelatin capsule
 - Vial
 - Vaccine
 - Cephalosporins.

2

Out-Licensing

- EU-CTD Products
- FDF supply
- Differentiated dosage forms
- First to market generics

4

CMO

- Short lead time
- Competitive prices
- High quality
- Agile project team
- Flexible with high-free capacity

Our Impact

We have a record of successful partnerships in a variety of areas, being a key provider of life-saving treatments for the regions' most pressing health issues as HIV, HBV, HCV, COVID-19, as well as biologic treatments for diabetes in a list of low- to middle-income countries.

And today we are pioneering diverse medical solutions for Africa, by locally manufacturing millions of insulin vials and cartridges.

Visionary Minds,
Diverse Solutions.
