

MARC is a Technology Driven CDMO offering a broad range of services fitting business needs based on its expertise in Drug Product development and manufacturing.

Our purpose is to empower the fight for health and wellbeing through technologically enhanced formulations.

## Services

- Drug product Contract or co-development.
- Complete Life cycle management from development, process optimization and scaling – up to commercial manufacturing.

## Technology Capabilities

- **API synthesis:**  
Advanced synthesis expertise and process development of small molecules.
- **Drug product formulation Services:**
  - Formulation development of stable & effective drug delivery systems for even the most complex dosage forms challenges.
  - Rich offering of various drug development technologies that facilitate the development of safe pharmaceutical products through:
    - o Novel formulations, de-formulation or optimization of an existing formulation
    - o Quality by Design (QbD) and Design of Experiments (DoE)
    - o Preparation of the complete data package for regulatory filing
- **Analytical Services:**
  - Analytical Method Development, validation and transfer.
  - Stability studies for drug substances and drug products according to ICH requirements; performed in our own qualified stability chambers for various climatic zones.
  - Comparative In-vitro and compatibility studies for various dosage forms.
  - Characterization of Drug substance and excipients and setting specifications for drug products.
