

## **MARC for Medical Services and Scientific Research**

Performs activities in three distinct and harmonized areas, supporting different stages of research through discovery, preclinical and clinical phases.

### **1-MARC Contract Research Organization (MARC-CRO)**

Covers all major therapeutic areas, including specialty, rare diseases, and medical devices. MARC-CRO is officially registered at the Ministry of Health & Population (MOH), Central Administration of Research & Health Development, and conducts clinical trials under the Egyptian Drug Authority (EDA).

### **2-MARC Bioequivalence Center (MARC-BE) - GCC Accredited**

is officially licensed by the EDA and conducts bioequivalence studies with in-house scientific and regulatory expertise. MARC-BE carries out all study processes, from study design and protocol writing to the final study report issuance, ensuring compliance with all applicable regulatory requirements.

The center is equipped with the latest equipment used for advanced technologies, including designated spaces for housing, sampling, a fully equipped Intensive Care Unit, laboratories, and areas for data processing & archiving.

### **3-MARC Bioscience Research Laboratories**

Are a leading provider of integrated basic and translational research.

MARC's multidisciplinary highly motivated team of scientists and researchers is dedicated to developing patentable technologies that can lead to life-saving products.

MARC state-of-art laboratories are equipped with the latest technologies to support all phases of research, from discovery to development. A wide range of services is offered to support the scientific community from its different units: Biorepository (biobank) Unit, Molecular Biology Unit, Genomics Unit, Immunology Unit, Cell Culture Unit, Nanotechnology Unit, and Bioinformatics Unit.

MARC is a newly established integrative research center that aims to advance science by translating and applying scientific discoveries into practice.

### **Initiatives and Partnerships for Innovation:**

To help advance research,

- MARC center sponsors grant proposals.
- Training and educational services.
- Collaborations with national and international partners.
